SOPHOS

Sophos Central

The unified console for managing your Sophos products

Sophos Central lets you administer protection for endpoints, mobile devices, encryption, web, email, servers, wireless and more. Leveraging synchronized management technology, you'll benefit from security intelligence sharing, policies that follow users, easy configuration, detailed reporting, and actionable alerts.

Highlights

‣ Actionable alerts

‣ Summary dashboard for your environment

‣ Granular, per-user policy management

‣ Security Heartbeat contextual intelligence sharing

‣ Automatic Active Directory synchronization

‣ Simple migration tool for Sophos Enterprise Console admins

Easy and efficient central management

Sophos Central helps you manage security policies and administer multiple products from a single web interface. No management servers to deploy or install, your endpoints, servers, appliances, and devices will check in directly with Sophos Central to receive new settings, send alerts, and share contextual security intelligence.

Getting started is easy

Managing your security from Sophos Central means you no longer have to install or deploy servers just to get started. Sophos Central provides default policies and recommended configurations to ensure you get the most effective protection from day one.

Synchronized Security

The Sophos Security Heartbeat lets your Sophos products share real-time security intelligence. Sophos Central synchronizes that intelligence across your security products, creating more effective protection against advanced malware and targeted attacks. To take advantage of Sophos Security Heartbeat, you need Sophos XG Firewall along with any of our Central-managed endpoint products such as Sophos Intercept X.

Partner support

Your Sophos Partner also uses Sophos Central to manage their business, meaning you can grant them access to your configuration if needed. Want someone to check out your firewall configuration? No problem, your Sophos Partner can assist.

Empower end users with the Self-Service Portal

Using Sophos Email, Device Encryption, or Mobile? Our self-service portal lets your users access and manage their email quarantines, request encryption keys, remotely manage their smartphones and more, freeing up your help desk to focus on other tasks.
Migrate from Sophos Enterprise Console

Already using Sophos Enterprise Console to manage your endpoint and server security? You can migrate to Sophos Central using our handy migration tool. Your partner can advise you if a license switch is needed. Find out more at sophos.com/migration.
Technical Specifications

All you need is an updated web browser and an internet connection.

‣ Google Chrome
‣ Apple Safari
‣ Microsoft Edge
‣ Microsoft Internet Explorer 11
